## LASU RECORDS SUCCESS ON ON-LINE (e-test) EXAMINATION FOR KEY PUNCH AND COMPUTER OPERATORS

The Non-Academic Staff Establishment (NASE) of the Lagos State University has recorded another laudable feat on the recently concluded on-line tests for candidates seeking appointments into the positions of Key punch and Computer Operators in the University.

At the Information, Communication Technology [ICT], two hundred (200) candidates sat for the test and the results were **promptly** made available to the candidates on-line. As a result of the success achieved, through this prompt on-line test/examinations the Deputy Registrar (NASE) in her word said "***this innovation should presage the easy conduct and application of on-line tests for any cadre in the University. The speed of processing is commendable and I believe this form of testing should be recommended for adaptation across the University***".
